

G5/SPT PRIME SHADOW

LINEAR FIXTURES

Linear Architectural Lighting

The G5/SPT PRIME SHADOW is a high-end, black chromed reflector, low glare architectural linear, which offers a high lumen output while maintaining a UGR level below 16. The housing can be connected seamlessly to achieve longer runs. It is available for various run lengths for suspended mounting, surface mounting, and wall mounting. Our ERALUX colour finish reduces glare using a baked enamel coating that enhances and differentiates your project space.

EMERGENCY LED DRIVER (BLD-YTXXD-XXX)

BLD-YTXXD-XXX LED Emergency Driver is UL listed for field and factory installation that allows the same LED fixture to be used for both normal and emergency operation. In the event of a power failure, the emergency driver switches to emergency mode and operates the fixture for 90 minutes. This module will operate a LED array load at 8W or 15W with constant power at a rated output voltage of 30-60 VDC. The constant power design of BLD-YTXXD-XXX maintains the output wattage to the LED array, providing consistent illumination for the entire emergency runtime. Its slim shape is ideal for use in linear LED lighting fixtures.
